

Gilt Cream

- Use to retouch damaged gilding or to gild new surfaces
- Easy to use
- All colours are intermixable

Product use

Liberon Gilt Cream is an easy to apply gilt finish for restoring old gilding work and for giving a gilt finish to new surfaces.

Preparation

Seal porous surfaces, such as woods and plaster, with Liberon Fontenay Base before applying Liberon Gilt Cream. Ensure surface is clean, dry and free from dust.

Application

Apply to the surface with a cotton cloth or small brush for intricate areas. Allow to dry for a minimum of 4 hours, longer is possible and either leave matt or buff to a shine. For a better finish we recommend applying several thin coats of Gilt Cream as oppose to one thick coat.

Clean tools in white spirit.

Important: Always test product on a spare surface or inconspicuous area for colour, compatibility and end result.

Precautions

- Gilt Creams may be reactivated or thinned with turpentine or good quality white spirit.

Colours: Chantilly, Compeigne, Rambouillet, St Germain, Trianon and Versailles.

Packaging

Liberon Gilt Cream is available in 30 ml BP, 30 ml, 100 ml and a mixed set of 8 x 30 ml containers.

Health and Safety

Flammable. Repeated exposure may cause skin dryness or cracking. Keep out of the reach of children. Do not empty into drains. Use only in well-ventilated areas. If swallowed, do not induce vomiting: seek medical advice and show this container or label. Contains a honey perfume. May cause an allergic reaction.
